john carty wrote this book to get parents involved in their child s mathematics education especially that aspect involving word problems it goes from age 10 to year 10 so you don t need any calculus to do any of the questions a sound grasp of algebra would help in many cases there are 777 questions across 7 categories chapters and john s ideal was a child could start doing 3 or 4 questions a week and this way could be aged 16 before you get through all 777 successfully all answers are provided hints for problem solving are detailed in the forward but are in no way exhaustive in learning there is nothing wrong with repetition and to go through some

chapters 2 or 3 times would enhance maths problem solving skills in many students in some cases there are what maths educators call elegant solutions but in others a parent may come up with a different pathway to the correct answer john has been involved in using mathematics and in mathematics education all his life and feels bringing in the parents is a possible strategy to increasing the capacity of a child s mathematical toolkit
